

Keeps turning on & off while charging---also HOT

Posted by Fran Stein - 2013/07/06 13:39

Maybe I posted on the wrong place, but my Nook Color just won't stop turning on & off and getting very hot when I try charging it. Nook button can flash green, then back to orange. Tried a hard reset but didn't help. :blink:

Nook color charge cords are notorious for going bad. Take it to BN store and see if charges correctly or buy new cable.
