

Simple Touch Bible - Like an App

Posted by Jethro - 2012/07/06 13:32

Hi All, I don't consider myself an author, but more of a semi programmer. Recently, I finished the King James Bible Touch for the Nook Simple Touch. My goal was to research all the features of the Nook and design the Bible so it would function like an app.

Here are some screen shots and the cover. The Table of Contents is spaced and staggard for easier navigation. Additionally, at the beginning of each chapter there is a link to the table of contents and one or more search markers.

I'm not sure why this isn't showing up on the board, when I hit the edit button, everything is there.
