

## Disappearing highlights

Posted by Greg Meier - 2013/07/23 09:20

---

For a couple years I downloaded magazines on my Nook Color to study. I highlighted and made notes on the files. However, when I moved the files from the Downloads folder to the Magazines folder (under My Files) all of the highlights and notes disappeared. I turned it on and off, powered down, moved a few files back to the Downloads folder but the highlights and notes are still gone. I really don't want to restudy and highlight all those articles again. Any suggestions please? :(
