

In general you don't want to delete material you want to archive it. **View the item details and select "Archive"**.

If you want to **really** remove the item (book sample, free book you hated, etc) checkout the user guide or follow these steps:

- Login to B&N online with your computer
- Go to Digital Downloads > My eBook Library
- Find the books in your Library on the Left
- You'll see a download option as well as "archive" and "delete". You want to use "delete" at this point. **As I understand it you will no longer own this content if you delete it.**
- Go to the nook and enter "My B&N Library"
- Select "Check for new content"

The item should now be gone.
