It has been possible to **root** the new **Nook Tablet** for a while - but it's been a *complicated* process we've been hesitant to recommend for most users! Now *thanks to folks over at xda-developers* it can be done simply by writing a few files to an SD card, inserting it into the device, and rebooting!

This new root works on any firmware version including 1.4.1 of the Nook Tablet and will transform your nook Tablet into a full-fledged Android tablet - **complete with Google apps and Android Market.**

If you've done this on the Nook Color the process is pretty similar. You need to download some stuff to an SD card, boot with it, etc.

[Here are some step-by-step instructions](#) you can use on Windows to get your Tablet up and
