

The latest 1.4 update was a very minor release

- Extended AT&T Wi-Fi Hotspot support — FREE and seamless connection to AT&T's entire nationwide Wi-Fi network
- New extra extra large font size
- Go-To Page feature allows users to go to a specific page in their eBook

The goto page option should have been in the first release. I think after being brow beat by users after 1.3 they had to add it in ;)
